Report Description

A display device is an output device for presenting information in visual or tactile form. When the input information supplied has an electrical signal, the display is called an electronic display. A 2D-head-mounted display (HMD) is a display device worn on the head or as part of a helmet that has a small display optic in front of one (monocular HMD) or each eye (binocular HMD). An HMD has many uses, including gaming, aviation, engineering, and medicine. Virtual reality headsets are HMDs combined with IMUs. There is also an optical head-mounted display (OHMD), a wearable display that can reflect projected images and allow a user to see through it.
